Chortitza Mennonite Settlement Census for October 1810

State Archives of Dnipro Region (DADO)

Fond 134, Opis 1, Delo 269

Translation and comments by Richard D. Thiessen

The following census lists Mennonites living in the Chortitza Mennonite Settlement in October 1810. The census was carried out by each individual village over several days in 10-15 October 1810. Most of the censuses that have survived for this time period appear to have been written by one individual (all entries have the same handwriting). In this particular case, each village was recorded and written by an individual from the village (perhaps these were drafts that were submitted to a central office before one final version of the census was compiled). Thus, there are differences in terms of the information that was compiled from one village to the next. In the village of Chortitza, the recorder was careful to note the age of an individual to the half-year. On the other hand, in Insel Chortitza as well as in Schoenhorst, the ages of individuals do not appear to change very much between this census and the May 1811 census, which is unusual in comparison to the other villages.

The spelling of names appearing in this translation follows the most commonly used spellings of today and not necessarily as found in the original.

In some villages, a number of single men living with families, along with maids, servants, and foster children, were identified by both their given names and their surnames. However, this is not the case for most villages. As a result, many servants, maids, and foster children cannot be identified with GRANDMA numbers because only their first names were given. In some cases, servants and maids were children whose parents were still alive but for economic reasons, the children were employed in another household. In other cases, servants and maids were orphans, or a parent was deceased and the surviving parent had remarried and the blended family was not able to accommodate all of the children. Foster children were usually children whose parents have both died. The death of a parent often resulted in dire consequences for the surviving children, especially if the family was landless.

The census indicates that the Chortitza Mennonite Settlement had a population of 2,252, including 1,150 males and 1,102 females. What is interesting to note is that of the 331 landholding households in the settlement, 133 (40%) were blended families, while of the 104 *Anwohner* households, 13 (12.5%) were blended families (many *Anwohner* couples were either recently married or older couples whose children had moved away from home). There were 41 foster children in the settlement, along with 68 servants and 48 maids (5% of the settlement's population were servants or maids).

GRANDMA is a reference to the **G**enealogical **R**egistry **an**d **D**atabase of **M**ennonite **A**ncestry, version 20-07, published by the California Mennonite Historical Society in July 2020. It should be noted that GRANDMA numbers can change over time, and so the numbers assigned to the individuals in this file may not remain accurate.

Cells in gray indicate words or numbers that are illegible.

Printing Note: This document is formatted for 8½ x 14 paper.
