Nearly all of the Mennonite records from the Schönsee Mennonite congregation near Culm were lost during World War II. As a result, one must rely on other records for genealogical research.

Lutheran churches in Prussia were required to record the births, marriages and deaths of Mennonites from 1800 until 1874. The Lutheran church records of Culm contain many records for Mennonite of the Schönsee congregation. These have been extensively mined by Adalbert Goertz using microfilm available from the Mormon "LDS" collection.

All (or nearly all) of these families were members of the Schönsee Frisian Gemeinde. A few of these families are descendants of the Old Flemish (Groningen) Gemeinde from Przechowka. In 1849 the remaining Old Flemish merged with the Frisian congregation. For the tabulation below surnames and village names have been standardized as an aid for sorting. "GM" entries are from the GRandMA database using the Husband-Wife pair search. There are 14 entries from 1841 which were not included because the page identifying the surname, parents and birthdate was missing.

The data is presented in chronological order and also sorted by father's name.
