

Chortitza Mennonite Settlement Census for May 1816

State Archives of Dnipro Region (DADO)

Fond 134, Opis 1, Delo 498

Translation and Comments by Richard D. Thiessen

The following census lists Mennonites living in the Chortitza Mennonite Settlement in May 1816. This is not an official census, but an economic listing of the settlement that was required every three months.

The November 1815 and October 1816 census lists were a significant aid in determining the identity of several individuals, particularly maids and servants, who are often only listed by their first names in this census. The November 1815 census also allowed for the identification of stepchildren in some cases. The spelling of names appearing in this translation follows the usual spellings and not necessarily as found in the original.

All village names as well as first and last names have been standardized for easier searching and sorting. Since the census was recorded by various village officials and the spellings of names changed from year-to-year, as different men took over the role of village secretary, the spellings of names in the original census lists are meaningless from a genealogical perspective.

Landholder numbers indicate the official property number assigned to the property and was not a physical address. The corresponding numbers for landless families are meaningless and sometimes change from one census to the next.

Please note that the surname was not recorded for most children, including a wife's children from a previous husband. Today we would classify these children as stepchildren of the head of the household, but this was not done in the censuses of this time. It appears that the only time the term stepson or stepdaughter was used is when both of the child's biological parents had passed away, and either the head of the household or his wife was the surviving spouse of one of that child's biological parents. Attempts have been made to sort out the often complex blended families in many households.

In some instances, single men living with families, along with maids, servants, and foster children, were identified by both their given names and their surnames. However, this is not always the case. As a result, many servants, maids, and foster children cannot be identified with GRANDMA numbers because only their first names were given. In some cases, servants and maids were children whose parents were still alive but for economic reasons, the children were employed in another household. In other cases, servants and maids were orphans, or a parent was deceased, and the surviving parent had remarried and the blended family was not able to accommodate all of the children. Foster children were usually children whose parents have both died. The death of a parent often resulted in dire consequences for the surviving children, especially if the family was landless.

The data for Neuendorf #32-39 is missing. It should also be noted that the data for the village of Insel Chortitza is correct for 1816, unlike the October 1816 census, which uses data from 1814.

Unlike some other census lists from this era, infants born in 1816 are nearly always listed as being one year old instead of half a year or a quarter of a year old.

The second last column contains the number in the GRanDMA database. GRanDMA is a reference to the Genealogical Registry and Database of Mennonite Ancestry, version 20-07, published by the California Mennonite Historical Society in July 2020. It should be noted that GRanDMA numbers can change over time, and so the numbers assigned to the individuals in this file may not remain accurate. Yellow highlighted cells indicate that the individual cannot be identified in the GRanDMA database at this time.
