Appendix 16 of Friesen's book contains the transcription of part of a Russian document found in Fond 69 Opis 1 Delo 322 of the Khorezm provincial archives. This extraction also contains some population numbers for Ak Metchet:

1899 – 140

1902 – 155

1906 – 155

1911 – 137

1914 – 174

1929 – 280

1934 – 196 [this census includes only working people – nearly all over 16 years of age]

This extraction also contains a census of all those considered “working” in Ak Metchet as of 18 Mar 1934. This information was gathered in an effort to collectivize the community. Note that this is **not** a complete census – only 5 individuals under the age of 16 are counted.

Unfortunately, the Ak Metchet Mennonites strongly resisted any government efforts to interfere in their educational system and to collectivize. As a result, the entire Mennonite community was exiled the next year. Note that “Native” in column 8 indicates that the person was born in Ak Metchet

I have extracted the names, ages and other genealogically important information from this file and tabulated the results. The birth years are calculated by simply subtracting the ages given in the document from 1934. If an age is not available, the cell is left blank. I have also included a column with the reference number of the person in the 1906 table. Greyed-out cells indicate that the person was too young to be on the 1906 list.

In both lists, bold highlighting indicates a new family unit. All names have been standardized from the original Russian. I have added GReDnA database numbers to both lists. Greyed-out cells indicate that I did not add the person to the database, usually for obvious reasons.
