

# Mennonites in the 1875 Kansas State Census

Extracted by John D. Richert ([jdrichert@aol.com](mailto:jdrichert@aol.com))

The 1875 Kansas State Census<sup>1</sup> was the first census taken following the initial immigration of Mennonites from South Russia, Volhynia and Poland to North America. In most instances the individuals who were responsible for the census collection and enumeration found it difficult to spell the names of these new immigrants and most surname entries were spelled pseudo-phonetically, often with the given names entered simply as an initial. In most cases, however, the given name of the head of household was entered. In some instances the given name was wrong because it appears the Mennonites were accustomed to the Russian census patronymic practice of providing their given name as well as their father's name to the census taker which resulted in confusion here. In a few cases I could not determine the surname and I simply transcribed it in *Italics* as entered in the census. I did not find it difficult to identify the Mennonite families because the census record for each individual gave the place of birth as well as place of residence prior to arrival in Kansas. Birth in Prussia, Poland or Russia with prior residence in Russia was a very common entry for nearly all of these Mennonites. The 1875 Kansas State Census contains more information than I transcribed, including: Color [Ethnicity], Value of Real Estate, Value of Personal Property, Attended school within the year?, Illiteracy, Agriculture (including acreage owned/value, farm implements/value, plantings, etcetera). The sum of Real and Personal Property should provide an estimate of net worth but I suspect that some of the households may have held cash which they chose to not report as personal property. It should be of no surprise that I found Bernhard Warkentin (GM# 69192)<sup>2</sup> to be the wealthiest of all the entries. The pre-printed census form stated the effective date of the census was to be March 1875. I estimate the entries were made between April and July 1875.

In the accompanying spreadsheet I have compiled each family with the family head entered in **bold** using surname spelling commonly associated with that individual. Given names are entered as shown in the original census with corrections or additions entered by me shown in [brackets]. With only a few exceptions I have made all entries in the same sequence as the original. The exceptions were in instances where the listing within a family was especially confusing. The census procedure required that dwellings be counted as well as family units with tabulation at the bottom of each page noting the number of dwellings and the number of families on that page. In

<sup>2</sup> "GRanDMA (Genealogical Registry and Database of Mennonite Ancestry) database version GM21-01 Jan 2021". California Mennonite Historical Society (CMHS).

my compilation I have placed a box around each group of individuals associated with a dwelling. Unfortunately some of the census pages are not clear or consistent in this regard and I had to make a best guess instead. It seems probable that some of these families were still living in “Immigrant Houses” but the census is silent in this regard.

The five tables below cover the following counties: Barton, Harvey, Marion, McPherson and Reno. I found 140 Mennonites in Barton County, 389 in Harvey County, 3331 in Marion County, 547 in McPherson County and 161 in Reno County. The column headings are described as follows: Img, is the image number in the Family Search image collection, Page is the page number in the indicated township in the census, Line is the line number on the indicated census page, Name is entered with surname first, Age is as given in the census, Birth is the estimated birth year calculated from the given age, Sex is as given in the census, Occupation is as given in the census, Birthplace is as given in the census, From is where the individual came from to Kansas as given in the census, GM# is the serial number from the GRandMA database which I believe fits this individual and Immigration is the date of arrival and ship on which the family head arrived in North America. Immigration information was obtained from the GRandMA database and from “Brothers in Deed to Brothers in Need”<sup>3</sup>
